SUMMARY

Software Engineer skilled in TypeScript, Node.js, and React.js, experienced in front-end and back-end development, delivering reliable solutions, and capable of solving complex technical challenges. With 2 years of experience, he mastered various technologies to tackle complex challenges. He thrives on learning and is committed to continuous growth, ready to take on new challenges in the tech world.

SKILLS

Technical Skills	JavaScript, TypeScript, React, Redux, Next.js, Node.js, Express.js, Nest.js, SQL, NoSQL, PostgreSQL, MongoDB, MySQL, TypeORM, Prisma ORM, Redis, Git, Docker, TanStack Query, Jest, WebSockets, AWS S3, AWS CloudFront, HTML, CSS, SCSS, TailwindCSS, Styled Components, RESTful APIs, OOP, SOLID, Agile, Debugging, SDLC.
Soft Skills	Adaptability to change, collaboration, attentiveness, critical thinking, teamwork, emotional intelligence, time management, reliability, conflict resolution, growth mindset.

WORK EXPERIENCE

Full Stack Developer | *Handelnine Global* | *Remote*

Nov 2023 – Sep 2024

Project: ERP system.

- Developed an admin panel for managing users and setting up their permissions;
- Contributed to order and warehouse management modules using React and Nest.js;
- Automated settlements for shipment providers using API integrations, FTP connection and file parsing logic, coupled with AWS S3 integration, reducing processing time;
- Improved operational responsiveness by integrating Slack API for downtime notifications;
- Implemented role-based access control for frontend and backend to manage user permissions.

Technologies: TypeScript, React, Nest.js, Redux, MySQL, MongoDB, Prisma, Mongoose, AWS, Jest, Agile

Full Stack Developer | *CGS-team* | *Remote*

Sep 2023 – Nov 2023

Project: A platform that enables multifamily operators to work better with real estate agents and locators.

- Contributed to lead details and property management modules along with filtering, and searching;
- Implemented bug fixes and minor feature enhancements, improving system stability and user experience.

Technologies: TypeScript, Next.js, React, Express.js, SWR, PostgreSQL, TypeORM

Junior Full Stack Developer | *Your IT Soft* | *Ternopil, Ukraine*

Jun 2021 – Aug 2022

Project: A project designed to help farms and households track energy usage, generate reports, and facilitate monthly settlements.

- Designed and implemented UI and APIs for managing tariffs and tariff groups, allowing users to manage tariff data;
- Developed functionality to track client and contractor actions, ensuring a detailed history of changes;
- Assisted in developing the handbooks module to capture data on new green energy consumers and manage customer service center information.

Technologies: TypeScript, React.js, Nest.js, PostgreSQL, MaterialUI, TypeORM, RESTful API

EDUCATION

Master's in Computer Science, Ternopil Ivan Puluj National Technical University

2023 – present

Bachelor's in Computer Science, Ternopil Ivan Puluj National Technical University

2021 – 2023
